SECTION I: INTRODUCTION

The National Collegiate Athletic Association (“NCAA” and/or “Association”) is pleased to provide to member institutions/conferences the opportunity to submit a proposal to host one or more NCAA championships.

The information contained in this document and the accompanying attachments provides the minimum bid specifications for hosting any of these championships, as well as essential information that will provide assistance in the development of a creative, comprehensive and competitive bid proposal. The NCAA awards the privilege of hosting an NCAA championship to institutions’ several years in advance so those communities may work collaboratively with the NCAA to create positive experiences for its student-athletes, participating institutions, fans and the community.

A member institution or member conference of the NCAA must be designated as the host institution/conference for the championship. The administration of the championship is under the authority of the respective sports committee subject to final authority from the NCAA DII Championships Committee. All activities and events associated with the championship are to be approved by the sports committee.

2023	November 4, 2023
2024	November 9, 2024

The Division II Men’s and Women’s Cross Country Championships provide for a maximum of 34 (five, seven person) teams and minimum of 24 individuals per gender for a total of approximately 262 competitors per gender. The remaining 10 at-large teams are selected by the NCAA Division II Cross Country Committee. The top two individual finishers per region who are not part of a selected team automatically qualify to the championships, as well as any other individuals who finish in the top five at the regional meet and are not part of a selected team. Men’s races will be 10,000 meters while women’s races will be 6,000 meters. However, courses should have the capabilities to run 6,000 meters, 8,000 meters and 10,000 meters. Men will run first in even years and women will run first in odd years.
